WORK EXPERIENCE

Full Stack Developer   01.2020- 11.2021

*Panates Bilgi Teknolojileri A.Ş. (**www.panates.com**) (Izmir- Turkey)*

- I work as a full stack developer in projects that developed for hospitals in Turkey and abroad. Angular is used on the frontend, NodeJS, Typescript and ExpressJS is used on backend and MongoDB is used as database.

- I was chosen to research on real time emotion detection and machine learning for a project. In this research Python used as programming language.

- I work as a full stack developer in a project. C# .Net 5 Web API is used on the backend and Angular is used on the frontend.

Senior Web Application Developer   02.2019- 01.2020

*Medyatik Fikir (**www.medyatikfikir.com**) (Izmir- Turkey)*

- I worked as a senior in the project that carries out transactions such as customer operations, current account information, social media management, and follows special projects for the real estate sector. Using C# ASP.Net Core MVC 2.2, MS SQL Server.

- Various projects were developed using angular, jQuery, JavaScript, Web service, RESTful API, JSON and MVC in projects such as company-specific dynamic websites, content management systems, and software services specific to companies.

Senior Web Application Developer   **02.2015- 10.2018**

Azerbaijan Software Developers **(www.asd.ir)** **(Tabriz- Iran)**

- I worked as a team leader in the project, which has functions such as the state institution controlling whether the engineers have competencies such as documents, skills, experience, diplomas, and also the evaluation of the projects and the stage they are at. In this project .Net Core, angular, jQuery, bootstrap, and MSSQL were used.

- In the blood donation project, I worked as a senior in writing the end-to-end system from internet reservation to transferring the analysis results of blood analysis machines to the system. Technologies such as AngularJS, .Net MVC WEB API, RESTful API, jQuery, Bootstrap, MS SQL SERVER, and T-SQL were used in this system.

- In the energy sector, I worked as a senior in the management project of power generation facility such as wind turbine, thermal power plant for MAPNA group. JavaScript, jQuery, ASP.Net, MS SQL Server were used.

Junior web developer   **2012- 2015**

R&D Leading Group **(Tabriz – Iran)**

- In this system where patients and doctors are registered, C# ASP.Net, jQuery, JavaScript, MS SQL Server technologies were used in this project, where patients request appointments from doctors and doctors set appointment dates with appropriate planning.

EDUCATION

Information Technology

	Azeri & Persian: Native language.

PERSONAL SKILLS

- Experienced in team- work
- Creative thinking and problem solving
- Strong analytical skills and project management
- Good communication
- Energetic, Innovative and Initiative

TRAINING COURSES

- Online course **"Computer Sciences"** from Southampton University.
- Online course **"CV Advice"** from Glasgow University.
- Online course **"Learn to Code for Data Analysis"** from Open University.

Research Interests

- Artificial Intelligence
- Machine Learning
- Deep Learning
- Computer Vision
- Image Processing
- Computer Graphics
- Augmented Reality
- Smart City
- Smart Home
- Robots

MEMBERSHIPS

- Member of Iran Technical and Vocational Training Organization.
- Member of Tabriz Institute of Technology.
